

Geo-Teva environmental consultants - Company Profile

Geo-Teva was founded in 1999 by David Meninger, a former senior district ranger of the Judean Desert and Dead Sea areas, in the Israel Nature Parks Authority, with over twenty years of experience. The company specializes in environmental consulting and has a solid background based on field work and academic studies in the areas of geomorphology – ecology – hydrology.

Environmental Consulting:

- Environmental impact assessment (EIA) and surveys.
- Environmental management systems of open spaces for preservation (industries "back yards", sustainable and ecological tourism development, etc.).
- Defining solutions for carrying out projects in areas with sensitive aspects of nature and landscape.
- Environmental documents for factories, gas stations, governmental offices, etc.
- Preparing open fields managing programs, with ecologic and/or tourist emphasis.
- Rehabilitation of quarries, mines, catchment areas and streams (ephemeral and perennial).
- Environmental and ecological PR, in association with Triwax Pr (Tera-Teva).

Experience:

- Implementation of the Geographic – Panoramic chapter in the environmental impact survey of the Dead Sea Works Ltd.
- Preparing and executing rehabilitation programs in the Dead Sea valley for the Quarry Rehabilitation Fund and Dead Sea Works Ltd.
- Environmental consulting in the Clay soil locating field and in the field of environmental quality, including a survey for the cause of locating raw material for Hassin-esh Industries Ltd. In Beer Sheva.

- Preparing a booklet of recommendations for environmental rehabilitation, for the Dead Sea Works Ltd..
- Writing environmental instructions for the Natural gas Pipe Lines national project.
- Writing an environmental document for the planned "Chazan" village situated in the Lachish region, and for the expansion of the existing Shomria village in the region of Beer-Sheva, on behalf of the Ministry of Construction & Housing.
- Preparing a landscape trail program along the Grar stream; hydrologic inspection of the plan to prevent erosion in the Sorek stream. Both works were done on behalf of the authority of drainage.
- Preparation of an environmental survey for the biodizel factory.
- Creating an environmental education program.

Tourism consulting and development

- Creating tourism programs for variant areas (Bnei Shimon Regional Council, Merhavim Regional Council).
- Writing a master plan for developing Bedouin sector tourism.
- Arranging programs for touristic centers.
- Assistance with promoting programs facing authorities.
- Matching marketing systems to regions.
- Writing tourism program for Lahav Forest Park; for Gvaot Bar village; and Meitar village.
